INK ILLUSIONS

All prices are inclusive of 20% VAT

Prices are only an estimate. Pricing is based on the complexity / number of stretch marks / scars, and the size of the area(s) being treated. There is a massive discount for having multiple areas treated at the same time. You must send us photos for an exact price per session.

Please note: Your individual quotation will break down the steps required for your treatment.

If your area isn't listed, please get in touch with photos so we can quote.

IMPORTANT: Not all scars / stretch marks are suitable for inking immediately. The texture may first need to be smoothed by inkless needling before adding ink. Please trust the advice we give you as we want the best possible outcome for you.

A colour test is always required before full tattooing.
